Specifications

Lattice Boom Truck Crane

HC-238H II

150-ton (136.08 metric ton)

HYLAB Series

HC-238H II Machine Transport Weights and Dimensions – approximate

Axle weights with boom base, with/without front outrigger box and with/without pusher axle. (Includes ropes and standard backstops)

	GVW	Front	Rear	Pusher
With front O/R box and with pusher axle	99,789 (45 264)	31,699 (14 378)	48,090 (21 813)	20,000 (9 072)
With front O/R box and without pusher axle	97,539 (44 243)	37,098 (16 827)	60,441 (27 416)	not applicable
Without front O/R box and with pusher axle	90,741 (41 159)	26,504 (12 022)	44,237 (20 066)	20,000 (9 072)
Without front O/R box and without pusher axle	88,491 (40 139)	31,902 (14 471)	56,589 (25 668)	not applicable

Axle weights with boom base, 10 ft. section, front outrigger box, and with/without pusher axle. (Includes ropes and standard backstops)

	GVW	Front	Rear	Pusher	Dolly
With pusher axle	108,044 (49 008)	35,923 (16 294)	40,644 (18 436)	20,000 (9 072)	11,476 (5 205)
Without pusher axle	105,794 (47 987)	41,322 (18 743)	52,996 (24 039)	not applicable	11,476 (5 205)

Axle weights with basic boom, with/without pusher axle, front O/R box and with/without rear O/R box. (Includes ropes and standard backstops)

	GVW	Front	Rear	Pusher	Dolly
With rear O/R box and pusher axle	120,388 (54 607)	33,134 (15 029)	48,623 (22 055)	20,000 (9 072)	18,630 (8 450)
Without rear O/R box and with pusher axle	110,434 (50 092)	35,845 (16 259)	35,959 (16 311)	20,000 (9 072)	18,630 (8 450)
Without rear O/R box and without pusher axle	108,184 (49 071)	41,244 (18 708)	48,310 (21 913)	not applicable	18,630 (8 450)

Axle weights Live Mast, without pusher axle and without front or rear O/R box. (Includes ropes and standard backstops)

	GVW	Front	Rear
Live mast over front	85,334 (38 707)	38,520 (17 472)	46,814 (21 234)
Live mast over rear	85,334 (38 707)	33,054 (14 993)	52,280 (23 714)

A – 8' 4.25" (2.55 m) Track (rear)
B – 8' 9" (2.67 m) Track (front)

* – Dolly weight = 5,000 lbs. (2 268 kg) — Dolly weights vary. Refer to manufacturers weight when determining axle loads.

HC-238H II Machine Transport Weights and Dimensions – approximate

HC-238H II Transportation Weights – approximate

Base Machine: 85 gallons (321 L) of carrier fuel, 12-part boom hoist reeving, rigid boom backstops, auxiliary lifting bail, 950' (290 m) front hoist rope, 600' (182.88 m) rear hoist rope and 77 gallons (291 L) of upper fuel

Item Description	Gross Weight		Transport Loads								Notes and Load Summary
	lbs.	kg.	#1	#2	#3	#4	#5	#6	#7	#8	
Base Machine	85,080	38 592	1								<p>Numbers in the load columns to the left represent quantities.</p> <p>Estimated transport assumes the load out consist of 260' (79.25 m) of tube boom + 75' (22.86m) of jib with full counterweight.</p> <p>Support loads were targeted at 45,000 lb (20 412 kg), 8' 6" (2.6 m) wide, 48' (14.6 m) long, and 13' 6" (4.1 m) high using a drop deck trailer. This may vary depending on state laws, empty truck/trailer weights, and style of trailer.</p> <p>Estimated weights vary by +/- 2%.</p> <p>Estimated Total Load of #1 85,080 lbs. (38 592 kg).</p> <p>Estimated Total Load of #2 42,656 lbs. (19 348 kg).</p> <p>Estimated Total Load of #3 44,964 lbs. (20 395 kg).</p> <p>Estimated Total Load of #4 24,351 lbs. (11 045 kg).</p> <p>Estimated Total Load of #5 3,241 lbs. (1 470 kg).</p> <p>Estimated Total Load of #6 3,241 lbs. (1 470 kg).</p> <p>Estimated Total Load of #7 3,241 lbs. (1 470 kg).</p> <p>Estimated Total Load of #8 8,049 lbs. (3 651 kg).</p>
Add Front outrigger box with manual pins	9,048	4 101		1							
Add Hydraulic pins to front outrigger box	647	293									
Add Rear outrigger box with hydraulic pins	9,954	4 515		1							
Add "A" bumper counterweight	13,500	6 123		1							
Add Main outrigger floats	660	299		1							
Add Front outrigger float	80	36		1							
Add "A" counterweight	23,000	10 433			1						
Add "B" counterweight	19,330	8 768			1						
Add "C" counterweight	21,110	9 575				1					
Add Upper Catwalk – Left Side	154	70									
Add 20' (6.10 m) Boom base section	3,350	1 520								1	
Add 30' (9.14 m) Boom top section	4,890	2 218		1							
Add 10' (3.05 m) Boom extension	973	441									
Add 10' (3.05 m) Boom extension with lifting sheaves	2,607	1 183									
Add 10' (3.05 m) Boom extension – luffer ready	3,162	1 434								1	
Add 20' (6.10 m) Boom extension	1,537	697								1	
Add 30' (9.14 m) Boom extension	2,115	959									
Add 40' (12.19 m) Boom extension	2,678	1 215									
Add 50' (15.24 m) Boom extension	3,241	1 470				1	1	1	1		
Add Auxiliary tip extension	640	290									
Add Hydraulic third drum to boom base section	0	0									
Add Third drum fleeting sheave for luffer to boom base section	176	80									
Add Third drum 3-sheave assembly to boom top section	381	173									
Add Third drum controls for free spooling	100	45									
Add 30' (9.14 m) Tubular Jib	1,683	763			1						
Add 15' (4.57 m) Tubular Jib Extension	317	144			3						
Add Basic luffing attachment	10,567	4 793									
Add Luffing jib top with nose wheel	2,851	1 293									
Add 10' (3.05 m) luffing jib extension	688	312									

HC-238H II Transportation Weights – approximate (continued)

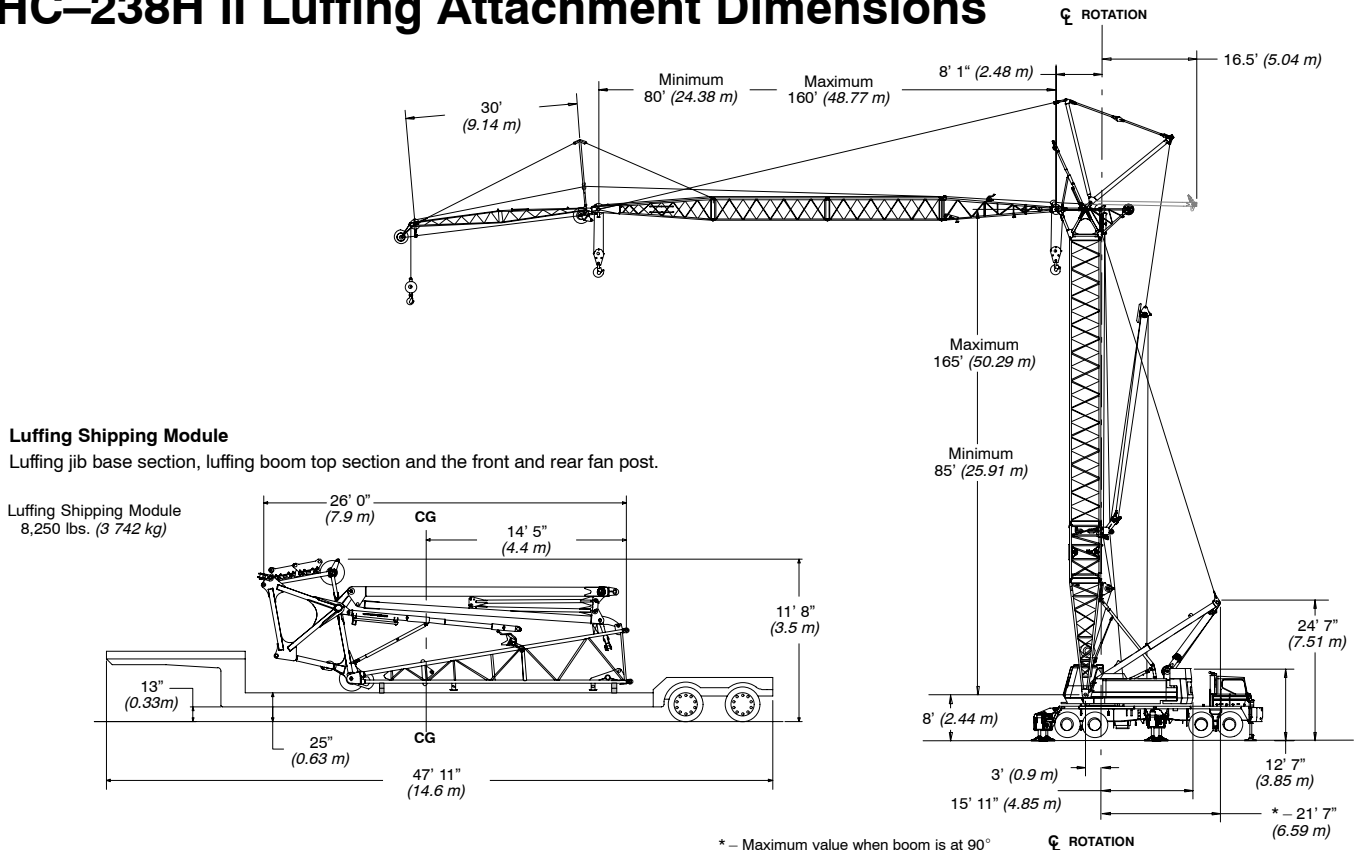

Item Description	Gross Weight		Transport Loads							
	lbs.	kg.	#1	#2	#3	#4	#5	#6	#7	#8
Add 20' (6.10 m) luffing jib extension	1,197	543								
Add 30' (9.14 m) luffing jib extension	1,518	689								
30' (9.14 m) luffing fixed jib conversion	280	127								
Add Hammerhead top section	4,950	2,245								
Add 0.88" x 465' (22 mm x 142 m) Type 'DB' jib wire rope	628	285								
Add 0.88" x 600' (22 mm x 183 m) Type 'RB' jib wire rope	900	408								
Add 0.88" x 805' (22 mm x 245 m) Type 'DB' jib wire rope	1,070	485								
Add 0.88" x 745' (22 mm x 227 m) Type 'RB' 3rd drum rope	1,117	507								
Add 15-ton (13.6 mt) Hook Ball – Non-swivel	750	340								
Add 15-ton (13.6 mt) Hook Ball – Swivel	760	345		1						
Add 25-ton (22.7 mt) two sheave Hook Block	1,164	528		1						
Add 60-ton (54.4 mt) two sheave Hook Block	1,650	747								
Add 140-ton (127 mt) six sheave Hook Block	2,600	1,179		1						
Remove Auxiliary Lifting Bail	-410	-186								
Remove Front hoist rope 0.88" x 950' (22 mm x 290m) of type 'DB'	-1,350	-612								

Refer to page three for
Transportation Weights
Notes and Load Summary.

HC-238H II Machine Working Weights

Option	Description	Gross Weight lbs. (kg)	Maximum Ground Bearing Pressure psi (kg/cm ²)
1	Base Machine equipped with 50' (15.24 m) of tube boom, live mast, "ABC" counterweight, 950' (290 m) front hoist rope, 600' (182.88 m) rear hoist rope, 140-ton (127 mt) hook block, 77 gallons (291.4 L) of fuel, 85 gallons (321.76 L) of carrier fuel, front and rear outrigger boxes with floats and fifth outrigger float, and 200 lbs. (90.7 kg) operator.	183,875 (83 404)	177 (12.44)
2	Option #1 plus "A" bumper counterweight and 210' (64.01 m) of boom extensions to obtain 260' (79.25 m) of main boom.	211,723 (96 306)	92 (6.47)
3	Option #2 plus 75' (22.86 m) of tubular jib and 15-ton (13.6 mt) hook ball – subtract 30' (9.14 m) of boom extension to obtain maximum 230' + 75' (70.1 + 22.9 m) of main boom + jib.	212,597 (96 432)	115 (8.09)
4	Option #1 plus "A" bumper counterweight, 140' (42.67 m) of boom extensions, luffing boom top, 160' (48.77 m) luffing jib, and 15-ton (13.6 mt) hook ball. Remove 30' (9.14 m) open throat top.	222,126 (100 756)	112 (7.87)
5	Base Machine equipped with 35' (10.67 m) of Hammerhead boom, live mast, "ABC" upper counterweight and "A" bumper counterweight, 950' (290 m) front hoist rope, 600' (182.88 m) rear hoist rope, 140-ton (127 mt) hook block, 77 gallons (291.4 L) of fuel, 85 gallons (321.76 L) of carrier fuel, front and rear outrigger boxes with floats and fifth outrigger float, and 200 lbs. (90.7 kg) operator.	197,435 (89 555)	172 (12.09)

HC-238H II Luffing Attachment Dimensions

HC-238H II Luffing Attachment Nomenclature

Attachment Options

■ 50' – 260' (15.24 – 79.25 m) Open Throat Boom

Basic Boom – 50' (15.24 m) two-piece design that utilizes a 20' (6.10 m) base section and a 30' (9.14 m) open throat top section with in-line connecting pins. Boom extensions are 70' (1.78 m) wide and 62" (1.57 m) deep centers.

- 135-ton (122.47 mt) maximum capacity
- Boom feet on 55" (1.40 m) centers
- 4" (0.10 m) "HX" diameter chords
- Top section includes mounting lugs for all optional attachments.
- Lugs on base section to attach carrying links.
- Skywalk platform
- Base section has mounting lugs for optional third hoist drum.
- Permanent skid pads mounted on top section to protect head machinery
- Six, 20.5" (0.52 m) root diameter steel sheaves mounted on sealed anti-friction bearings
- Mechanical boom angle indicator
- Deflector roller on top section
- Quick reeve boom top

Boom Extensions – The following table provides the lengths available and the suggested quantity to obtain maximum boom in 10' (3.05 m) increments. Midpoint pendant connections are required at 110' (33.53 m) for boom lengths of 250' (76.2 m) and 260' (79.25 m).

Boom Extensions	Suggested Quantity for Max. Boom
10' (3.05 m) With or without lifting sheaves	1
20' (6.10 m)	1
30' (9.14 m)	0
40' (12.19 m)	2
50' (15.24 m)	2

- Deflector roller on top of each section
- Appropriate length pendants
- Maximum boom tip height of 264' (80.47 m)
- 10' (3.05 m) extensions with lifting sheaves is available for self assembly/disassembly.

■ 35' (10.67 m) Hammer Head Boom

Three-piece design that utilizes a 20' (6.10 m) base section, a 10' (3.05 m) transition extension and a 5' (1.5 m) head top section with in-line connection pins.

- 150-ton (136 mt) maximum capacity
- Maximum boom tip height of 42' (12.80 m)
- Boom feet on 55" (1.40 m) centers
- 4" (0.10 m) "HX" diameter chords
- Lugs on base section to attach carrying links
- Skywalk platform
- Deflector roller on top section
- Rigid sheave guards
- Seven, 20.62" (0.52 m) root diameter steel sheaves mounted on sealed anti-friction bearings
- Mechanical boom angle indicator

■ 30' – 75' (9.14 – 22.86 m) Fixed Jib

Basic Fixed Jib – 30' (9.14 m) two-piece design that utilizes a 15' (4.57 m) base section and a 15' (4.57 m) top section with in-line connecting pins on 32" (0.81 m) wide and 24" (0.61 m) deep centers.

- 2" (38.1 mm) "BK" diameter chords
- One 18.5" (0.47 m) root diameter steel sheave mounted on sealed anti-friction bearings.
- 15' (4.57 m) jib extensions provide jib lengths at 45' (13.72 m), 60' (18.29 m) and 75' (22.86 m).
- Jib offset angles at 5, 15 and 25 degrees
- Maximum tip height of open throat boom + fixed jib is 308' (93.87 m).

■ 80' – 160' (24.38 – 48.77 m) Luffing Jib

Basic Luffing Jib – 80' (24.38 m) five-piece design utilizes a 5' (1.52 m) luffing boom top section, 20' (6.10 m) base section, 10' (3.05 m) extension, 30' (9.14 m) extension, and 20' (6.10 m) top section with in-line connecting pins. Boom extensions are 44" (1.12 m) wide and 54" (1.37 m) deep at the centers.

- 27-ton (24.5 mt) maximum capacity
- Working lengths of 80' (24.38 m) to 160' (48.77 m).
- Top section includes mounting lugs for all attachment options
- Lugs on base section to attach fan-post transport links
- Two steel 18" (0.46 m) diameter luffing jib head sheaves
- Two polyamide 21.25" (0.54 m) diameter luffing boom auxiliary head sheaves
- Pin-on nose wheel
- Eight-part luffing jib hoist.
- 1.25" (31.75 mm) diameter type "N" pendants

Luffing Jib Extensions – The following table provides the lengths available and the suggested quantity to obtain the maximum luffing jib in 10' (3.05 m) increments. Midpoint pendants are not required.

Luffing Jib Extensions	Suggested Quantity for Max. Boom
10' (3.05 m)	0
20' (6.10 m)	1
30' (9.14 m)	2

Note: Extensions and pendants are common with the LS-138H, LS-138H II, LS-208H and LS-208H II.

- Deflector roller on top of each extension
- Appropriate length pendants
- Max. luffing jib tip height of 326' (99.36 m)

■ 30' (9.14 m) Fixed Jib

- Common fixed jib used on open throat boom.
- Maximum luffing jib plus fixed jib tip height of 347' (105.77 m)

■ 85' – 165' (25.91 – 50.29 m) Luffing Boom

- Common base and extensions as open throat boom
- 10' (3.05 m) luffing extension required for bail anchor
- Working angles of 90, 85, 80, 75, 70, and 65 degrees.
- Working lengths of 85' (25.91 m) to 165' (50.29 m)
- 1.38" (34.92 mm) diameter type "N" pendants; same as open throat boom.

Luffing Boom Extensions – The following table provides the lengths available and the suggested quantity to obtain the maximum luffing boom in 10' (3.05 m) increments. Midpoint pendants are not required.

Luffing Boom Extensions	Suggested Quantity for Max. Boom
10' (3.05 m) Luffer Ready	1
20' (6.10 m)	1
30' (9.14 m)	0
40' (12.19 m)	2
50' (15.24 m)	2

- Rear hoist drum becomes luffing jib hoist
- Optional third drum provides second working hoist line, if required.
- Designed for self-assembly
- Luffing jib hoist bridle and bail can remain reeved for machine transport
- Job site mobility with attachment
- Rolled out or rolled under erection methods
- Compact transport module.

■ Auxiliary 5' (1.5 m) Tip Extension

Designed to use instead of a jib to provide clearance between working hoist lines. The extension is equipped with two 18" (0.46 m) root diameter nylon sheaves mounted on sealed anti-friction bearings. Maximum capacity is 9-ton (8.16 mt).

■ Boom Hoist System

Designed to lift off maximum boom or maximum boom plus jib unassisted. Operates up to a maximum boom angle of 80 degrees. Automatically limits maximum boom angle operation.

- Pin-on bail frame
- 12-part reeving with 7/8" (22.23 mm) type 'LB' wire rope
- Bridle assembly
- Two 1.38" (35.05 mm) pendants
- Tubular spring buffered boom backstops (rigid type) – standard
- Tubular spring buffered hydraulic boom backstops are optional to flip mast to rear of upper.
- Steel sheaves contain sealed anti-friction bearings.
- Boom speed from 0 to 82 degrees is 96 seconds with no load. Speed determined using 200' (60.96 m) of boom.

Revolving Upperstructure

■ Frame

All welded steel frame with precision machine surfaces for mating parts.

■ Engine

Isuzu 4HK1 diesel engine with oil filter, oil cooler, air cleaner, fuel filter, water separator, hourmeter, tachometer, and electrical shutdown.	
Number of cylinders	4
Bore and stroke – in. (mm)	4.53 x 4.92 (115 x 125)
Piston displacement – in ³ (cm ³)	317 (5 195)
Engine rpm at full load speed	2,100
Hi-idle rpm	2,100
Full load speed – h.p. (kw)	199(148)
Peak torque – ft.-lb. (joule)	507 (688)
Peak torque – r.p.m.	1,500
Electrical system	24 volt
Batteries	2–12 volt
Approximate fuel consumption	
Gal./hr (L/hr)	
100% H.P.	10.42 (39.44)
75% H.P.	8.20 (31.04)
50% H.P.	6.06 (22.94)
25% H.P.	3.03 (11.50)

■ Hydraulic System Specifications

Hydraulic Pumps – The pump arrangement is designed to provide hydraulically powered functions allowing positive, precise control with independent or simultaneous operation of all crane functions.

- Two variable displacement pumps operating at 4,000 psi (281 kg/cm²) and 64 gal/min (242 L/min) powers the load hoist drums, boom hoist drum and third drum.
- Two fixed displacement gear type pumps operating at 3,000 psi (210 kg/cm²) and 23 gal/min (87 L/min) powers the swing motors.
- One fixed displacement gear type pump operating at 1,200 psi (84.4 kg/cm²) and 8 gal/min (30 L/min) powers the pilot control system, clutches, brakes, pump controls and counterweight lifting cylinders.
- One fixed displacement gear type pump operating at 2,000 psi (141 kg/cm²) and 7 gal/min (26.5 L/min) powers the live mast rear storage cylinders.

Pump Control (“Fine Inching”) mode – Special pump setting, selectable from operator’s cab, that allows very slow movements of load hoist drums and boom hoist drum for precision work.

Hydraulic Reservoir – 42 gal. (159 L), equipped with sight level gauge. Diffusers built in for deaeration.

Filtration – One, 10 micron, full flow, line filter in the control circuit. All oil is filtered prior to entering the reservoir.

Counterbalance Valves – All hoist motors are equipped with counterbalance valves to provide positive load lowering and prevent accidental load drop if the hydraulic pressure is suddenly lost.

■ Load Hoist Drums

Each drum contains a pilot controlled, bi-directional, axial piston motor and a planetary gear reduction unit to provide positive control under all load conditions.

- Power up/down & free-fall operation modes
- Automatic brake mode (spring applied, hydraulically released, band type brake)
- 0.88” (22.22 mm) grooved lagging
- Drum pawl controlled manually
- Mechanical thumb thumper drum rotation indicators
- Mounted on anti-friction bearings
- 16.76” (0.43 m) root diameter
- 33.85” (0.86 m) flange diameter
- 23.15” (0.59 m) width

Note: The free-fall operational mode is designed to prevent load lowering even if the free-fall switch is accidentally activated. The automatic brake mode meets all OSHA requirements for personnel handling.

Drum Clutches – Speed-o-Matic™ power hydraulic two-shoe clutch design that uses a 26” (660 mm) diameter x 5.12” (130 mm) wide shoe that internally expands to provide load control. Swept area is 418 in² (2 697 cm²).

Drum Brakes – External contacting band type 38” (965 mm) diameter x 5” (127 mm) wide. Provides a swept area of 597 in² (3 851 cm²). Spring applied hydraulic release “automatic brake mode” or mechanical linkage foot control.

■ Optional Third Hoist Drum

The hydraulic winch is mounted in the boom base section in conjunction with a fleeting sheave and 3-sheave idler assembly to run the wire rope over the boom top section.

- Power up/down Automatic brake mode.
- Optional – Free-spooling capability for pile driving applications.
- Spring applied hydraulically released brakes.
- Grooved for 0.88” (22.22 mm) wire rope.
- 18.75” (0.47 m) root diameter.
- 27” (0.69 m) flange diameter.
- 24” (0.61 m) width.
- Mounted on anti-friction bearings.

■ Boom Hoist Drum

Contains a pilot controlled, bi-directional, axial piston motor and a planetary gear reduction unit to provide positive control under all load conditions.

- Spring applied, hydraulically released, disc type brake controlled automatically.
- Drum pawl controlled automatically.
- Mounted on anti-friction bearings.

- 0.88” (22.22 mm) grooved lagging
- 15” (0.38 m) root diameter.
- 30.71” (0.78 m) flange diameter.
- 12.04” (0.31 m) width.

■ Swing System

Pilot controlled bi-directional axial piston motors and planetary gear reduction unit provides positive control under all load conditions.

- Spring applied, hydraulically released, 360 degree multi-plate brake
- Free swing mode when lever is in neutral position
- Two position positive house lock
- Audio/Visual swing alarms
- Maximum swing speed is 2.2 rpm

■ Upper Counterweight

Consist of a three piece design that can be easily lowered to the carrier deck.

- 23,000 lbs. (10 432 kg) “A” counterweight
- 19,330 lbs. (8 768 kg) “B” counterweight
- 21,110 lbs. (9 575 kg) “C” counterweight
- Total upper structure counterweight 63,440 (28 776 kg)

■ Operator’s Cab and Controls

Fully enclosed modular steel compartment is independently mounted and insulated to protect against vibration and noise.

- All tinted/tempered safety glass
- Sliding entry door and front window
- Swing up roof window with wiper
- Door and window locks
- Heater with circulating fan
- Sun visor
- Engine instrumentation panel (tachometer, voltmeter, engine oil pressure, engine water temperature, fuel level, hydraulic oil temperature, hour meter, and service monitor system)
- Mechanical drum rotation indicators for front and rear hoist drums
- Six-way adjustable seat
- Dry chemical fire extinguisher
- Hand and foot throttle
- Fully adjustable single axis arm chair controls
- Swing lever with swing brake and horn located on handle
- Bubble type level
- Ergonomic gauge layout
- Control shut off lever

(continued from page 7)

HC-238H II Load Hoist Performance

Available line speed and pull - based on Isuzu 4HK1 engine at 2,100 rpm full load speed. Line Pulls are not based on wire rope strength. See wire rope capacity chart for maximum permissible single part of line working loads.

Front Drum - 7/8" (22 mm) Rope												
Layer	Maximum Line Pull		No Load Line Speed		Full Load Line Speed		Pitch Diameter		Layer		Total	
	lb	kg	ft/min	m/min	ft/min	m/min	in	mm	ft	m	ft	m

Revolving Upperstructure *(continued from page 7)*

■ Load Moment Indicator/Limiter

Standard Equipment: PAT DS-350G/1334 modular system that includes two line-riders, angle sensor, computer, graphics display, and anti two block equipment to provide the following information:

- Graphic representation of Machine Configuration
- Graphical step-by-step machine set-up
- Boom length & angle
- Jib length & angle
- Load on hook
- Rated load

- Load radius
- Tip height
- Anti-two block warning & function limiters operation mode
- Provides an audio/visual warning when the load on hook is within 90% of the cranes rated load.
- Provides an audio/visual warning and limits functions when the load on hook is at 100% of the cranes rated load.
- Operator settable alarms include maximum and minimum boom angle, maximum tip height, left and right swing, and range control (obstacle avoidance). These alarms provide an audio/visual warning only.

Note: Function limiters are activated for Anti-two block and overload conditions. These limiters are designed to prevent hoist up on front, rear and third hoist drums, and boom hoist down.

■ Additional Equipment – Standard

- 93" (2.36 m) outside diameter turn table bearing
- Front, and removable right catwalks.
- Left side catwalks are optional.
- 77 (usable) U.S. Gallons (291.5 L) fuel tank
- Upper lifting links
- Two 70-watt headlights

Carrier

■ Type

All welded steel frame with precision machined surfaces for mating parts.

- 11' 0" (3.35 m) wide
- 23' 6" (7.16 m) wheel base.
- 8 x 4 drive.
- 100,000 psi (689.5 mPa) alloy steel, triple box construction.

■ Axles

Front

- Tubular tandem axles
- 105" (2.67 m) track with single wheels.
- Oil lubed wheel bearings with see through hubcaps.
- 43,660 lbs. (19 804 kg) maximum axle loading at 56 m.p.h. (90 km/hr)

Rear

- Tubular tandem axles
- 100.25" (2.56 m) track with dual wheels.
- Oil lubed wheel bearings with see through hubcaps.
- 9.14:1 ratio with interaxle differential lockout
- 85,840 lbs. (38 936 kg) maximum axle loading at 56 m.p.h. (90 km/hr)

Optional Pusher Axle

- Tubular single axles
- 97.75" (2.48 m) track with dual wheels.
- Oil lubed wheel bearings with see through hubcaps.
- 22,000 lbs. (9 979 kg) maximum axle loading at 56 m.p.h. (90 km/hr)
- Can be air lifted to provide 4.31" (109.5 mm) clearance to ground
- Air controlled

■ Suspension

Front – Air-ride system, 4-bag walking beam style, that deflates to solid mount for increased stability during job site travel.

Rear – Solid mount, bronze bushed equalizer beams with rubber bushed torque rods.

■ Wheels

Front – Hub mounted steel disc.

Rear – Integral with planetary hubs.

■ Tires

Standard – 385/95 R25 VHS tubeless radials.

- Three-star rating
- Static load – 16.6 width x 24.6 radius

■ Brakes

Service

- Full air brakes on all wheel ends. Dual circuit with modulated emergency brakes.

Front

- 16.5" x 6" (0.42 m x 0.15 m) S-Cam brakes.

Rear

- 20.25" x 7" (0.51 m x 0.18 m) S-Cam brakes.

Parking/Emergency

- One spring set, air released chamber per rear axle end. Emergency brakes apply automatically when air pressure drops below 60 psi (413.7 kPa) in both systems.

■ Steering

- Sheppard full integral, hydraulic power.
- Steering mounted on high sides of frame to minimize exposure to hazards.
- High speed, high power system to maximize maneuverability both on job and on the road.

■ Transmissions

Main

- Eaton RTO 14908LL with 8 progressive highway gears and 2 "super low" gears for 10 forward and 3 reverse speeds.

Auxiliary

- Spicer P-1241-C; used with manual transmission; midship mounted with 4-speed gearing; 2.31:1 first gear ratio.

■ Electrical

Four group 31 batteries provide 12-volt operating system and 12-volt starting with 1,600 cold cranking amps available. Charging is provided by a 130 amp alternator.

Lights

- Four dual, sealed beam headlights
- Front, side, and rear directional signals with 4-way hazard system
- Stop and tail lights
- Rear and side clearance lights
- Side turn indicators
- Lighted license plate bracket

■ Outriggers

The outrigger system is designed with five hydraulically controlled outriggers that provide an optimal 360-degree working area and simultaneous operation of steering and outriggers.

- The front and rear outriggers are a double-box design that allows all four telescoping beams and jacks to extend/retract independently.
- Hydraulic controls are located at each outrigger location with the bumper outrigger operated at the front bumper. The controls are designed to allow both front and rear jacks to be operated from the driver's side of carrier if necessary.
- Vertical jack cylinders are equipped with holding valves.
- Quick-attach self-aligning rear outrigger box with hydraulic pins.
- Quick attach self-aligning front outrigger box with manual pins. Hydraulic pins are optional.
- Front left outrigger jack will tilt to allow front box to roll under carrier frame for removal.
- 34" (0.86 m) diameter quick-release steel floats.
- 24" (0.61 m) diameter self-storing aluminum bumper float.

Jack Reactions

- Maximum 180,000 lbs. (81 648 kg) force and 198 psi (1 365 kPa) ground bearing pressure on main outriggers
- Maximum 41,000 lbs. (18 598 kg) force and 91 psi (627 kPa) ground bearing pressure on front bumper outrigger.

Carrier Engine Specifications

Detroit Diesel Series 60 – 12.7 Liter with oil filter, oil cooler, air cleaner, fuel filter, water separator, tachometer and electrical shutdown.	
Number of cylinders	6
Bore and stroke – in. (mm)	5.12" x 6.30" (130 x 160)
Piston displacement – cu. in (cm ³)	778 (12 751)
Hi-idle rpm	2,225
Max brake hp (kw)	430 (321) @ 2,100 r.p.m.
Peak torque – ft./lb. (joules)	1,450 (1 966) @ 1,200 r.p.m.
Batteries	4–12 volt
Approximate fuel consumption	Gal./hr. (L/hr)
100% HP	19.90 (75.33)
75% HP	14.93 (56.52)
50% HP	9.95 (37.66)
25% HP	4.98 (18.85)

Bumper Counterweight

Standard

- "A" counterweight – 13,500 lbs. (6 124 kg)

Carrier Cab

Fully enclosed, one person. Galvaneal steel construction, lined with vinyl covered acoustical insulation with sound reduction insulation and isolated from engine compartment.

Equipped with:

- Air ride seat with seat belt
- 2–speed, electric windshield wiper and washer
- Tilt/telescoping steering column
- Front and roof, fresh air vents
- Safety plate glass on front
- Sliding, tinted, rear and right side windows
- Roll down door window
- Door and window locks
- Diagnostic connectors for engine
- Fire extinguisher
- 19,800 BTU heater/defroster
- Rubber floor mat
- Horn
- Dome light
- Accessory plug/lighter

Cab Instrumentation – Tilt–out (for service access), illuminated, instrument panel includes:

- Speedometer
- Hourmeter
- Voltmeter
- Odometer
- Tachometer

- Stop and check engine warning lights
- Fuel gauge
- Engine oil pressure gauge
- Engine temperature gauge
- Front and rear air pressure gauges with low air pressure warning buzzer/light
- Cruise controls
- Engine fan override switch
- Heater and defroster controls
- Light controls
- Park brake switch and applied light
- Engine diagnostic switch

Additional Equipment

Standard:

- Towing shackles, front and rear.
- Aluminum, full deck fenders and ladders
- Outrigger controls located on outrigger boxes.
- Engine throttle–up control switch
- West Coast–type rear view mirrors with adjustable convex mirror
- Trailer electrical and air connectors
- 2–way reading bubble levels
- Back–up alarm
- Mud flaps
- Air dryer
- Lug wrench
- Tire inflation system
- Remote plug for block heater
- 85 gal. (321.76 L) fuel tank

Optional:

- Spare tires and rims

Add Tandem Axle Dolly w/ Base and Peak	17,392	7 889	1,507	684	-2,922	-1 325				
Add Tandem Axle Dolly w/ Base and 10' (3.05 m) Self Assy.	15,002	6 805	1,588	721	1,958	888				
Add Hookblock to 10' (3.05 m) Self-assembly (w/ Dolly)	2,000	907	-29	-13	-937	-425				
Add Hookblock to Boom Peak (w/ Dolly)	2,000	907	-100	-45	-3,196	-1 450				

Axle	Maximum Allowable Load @ 65 mph (104 km/h)
Front Tandem	43,660 lb (19 804 kg)
Rear Tandem	85,840 lb (38 937 kg)
Pusher	20,000 lb (9 072 kg)

Lifting Capacities

Hydraulic Lattice Boom Truck Crane

HC-238H II 150-ton (136 metric ton) HYLAB Series

Tube Boom Capacities
50 – 260 ft. (15.24 – 79.25 m)

Live Mast Lifting Capacities
10' (3.05 m) Extension Lifting Capacities
5' (1.52 m) Tip Extension Capacities
Tube Boom Capacities

- 35' (10.67 m) Hammer Head Boom
- 50' – 260' (15.24 – 79.25 m) Open Throat Boom
- 70" (1.78 m) Wide x 62" (1.57 m) Deep boom
- On Fully Extended Outriggers
- 360° Rotation
- Counterweight options "ABC + A", "ABC", "AB", "A" and "0"

Note: Over Rear Capacities are published in the Crane Rating Manual only.

CAUTION: This material is supplied for reference use only. Operator must refer to in-cab Crane Rating Manual to determine allowable machine lifting capacities and operating procedures.

WARNING

READ AND UNDERSTAND THE OPERATOR'S AND SAFETY MANUALS AND THE FOLLOWING INSTRUCTIONS AND CHART VALUES BEFORE OPERATING THE CRANE. OPERATION WHICH DOES NOT FOLLOW THESE INSTRUCTIONS MAY RESULT IN AN ACCIDENT.

OPERATING INSTRUCTIONS

GENERAL:

1. Rated lifting capacities in pounds as shown on lift chart pertain to this crane as originally manufactured and normally equipped by Link-Belt Construction Equipment Company (LBCE). Modifications to the crane or use of optional equipment other than that specified can result in a reduction of capacity.
2. Construction equipment can be dangerous if improperly operated or maintained. Operation and maintenance of this crane must be in compliance with the information in the Operator's, Parts and Safety manuals supplied with this crane. If the manuals are missing, order replacements through the distributor.
3. The operator and other personnel associated with this crane shall read and fully understand the latest applicable American National Standards Institute (ANSI) safety standards for cranes.
4. All capacities listed in this book are in compliance with ASME/ANSI B30.5-1994, SAE J987-April 1994, and SAE J765-October 1990.

LIFT CRANE OPERATION:

1. Capacities shown are in pounds and are not more than 85% of the tipping loads on outriggers and 75% of the tipping loads on tires with crane standing level on firm supporting surface. A deduction must be made from these capacities for weight of hook block, hook ball, sling, grapple, load weighing devices, etc. When using main hook while jib is attached, reduce capacities by values shown on chart "Capacity Deductions For Lifting Off Main Boom Hook With Jib Installed." When using main hook while 5' Tip Extension is attached, reduce capacities by values shown in "Capacity Deduction for Lifting Off Main Hook with 5' Tip Extension Installed". See Operator's Manual for all limitations when raising or lowering attachment.
2. The hammerhead boom is available only in a 35' length.
3. The crane capacities in the shaded areas are based on structural strength or hydraulic limitations. The crane capacities in the non-shaded areas are based on stability ratings. Some capacities are limited by a maximum obtainable 80° boom angle.

4. For recommended reeving, parts of line, wire rope type and wire rope inspection, see Wire Rope Capacity Chart and Operators Manual.
5. For recommended reeving, parts of line, wire rope type, and wire rope inspection, see Wire Rope Capacity chart, Operator's Manual, and Parts Manual. Rated lifting capacities are based on correct reeving. Deduction must be made for excessive reeving. Any reeving over minimum required is considered excessive and must be accounted for when making lifts. Use Working Range Diagram to estimate the extra feet of wire rope included in reeving. Then consult Wire Rope Capacity chart to determine the weight per foot of wire rope type. Deduct this amount for each extra foot of wire rope before attempting to lift a load.
6. Rated lifting capacities do not account for the effects of wind on a suspended load or boom. Lifting capacities should be considered acceptable for wind speeds less than 20 mph and appropriately reduced for wind speeds greater than 20 mph. Extreme caution should be used when lifting heavy loads or loads with large wind sail area under high wind conditions (over 20 mph). See Wind Restriction charts in this manual for appropriate capacity reductions.
7. "On outrigger" capacities require that all four outrigger beams are fully extended, all five jacks are extended until all tires are clear of the ground and crane is properly leveled on a firm supporting surface.
8. The least stable rated condition is over the side.
9. Do not lift or suspend a load from the boom tip extension or jib and the main boom at the same time.
10. Do not swing over side until all four outrigger beams are fully extended, all five jacks are extended until all tires are clear of the ground and crane is properly leveled on a firm supporting surface.
11. "0+0" counterweight indicates no upper or carrier counterweight on the machine.
12. "A+0" counterweight indicates 23,000 lb. "A" upper counterweight with no carrier counterweight.
13. "AB+0" counterweight indicates 42,330 lb. "AB" upper counterweight with no carrier counterweight.
14. "ABC+0" counterweight indicates 63,440 lb. "ABC" upper counterweight with no carrier counterweight.
15. "ABC+A" counterweight indicates 63,440 lb. "ABC" upper counterweight with 13,500 lb. carrier counterweight.

16. Midpoint pendants are required on open throat booms 250 ft. and 260 ft. in length.
17. Load ratings are based on freely suspended loads and make no allowance for such factors as the effect of wind, ground conditions and operating speeds. Therefore the operator shall reduce load ratings in order to take these conditions into account.
18. 45' open throat boom consists of the 20' boom base section and the 25' open throat peak section.
19. 50'–260' boom lengths consist of the 20' boom base section, the appropriate length of boom extensions, and either of the following:
 - 30' open throat peak
 - 25' open throat peak w/5' open throat boom extension.
20. When using the 25' open throat peak section with boom lengths 50' or longer, the 5' open throat boom extension must be pinned directly to the 25' open throat peak.
2. Travel slowly and cautiously on a firm and level supporting surface.
3. Control load with taglines to prevent an increase in load radius while traveling. Failure to control load radius could result in a tipping condition, or boom and jib failure.

DEFINITIONS:

PICK AND CARRY CAPACITIES:

1. On tire capacities are restricted to a maximum travel speed of 1 mph (1.6 km/h). The boom must be centered straight over the rear with travel swing lock engaged and the load must be restrained from swinging.
1. Load Radius: Horizontal distance from a projection of the axis of rotation to the supporting surface, before loading, to the center of the vertical hoist line or tackle with load applied.
2. Boom Angle: The angle between the boom base section and horizontal with freely suspended load at the rated radius.
3. Working Area: Area measured in a circular arc about the center line of rotation as shown on the Working Area Diagram.
4. Freely Suspended Load: Load hanging free with no direct external force applied except by the hoist line.
5. Side Load: Horizontal side force applied to the lifted load either on the ground or in the air.

WIRE ROPE CAPACITY

Parts of Line	7/8"		Notes
	Type "DB"	Type "RB"	
1	22,700	17,520 *	Capacities shown are in pounds and working loads must not exceed the ratings on the capacity charts in this Crane Rating Manual. Study Operator's Manual for wire rope inspection procedures and one part of line applications.
2	45,400	35,040	
3	68,100	52,560	
4	90,800	70,080	
5	113,500	87,600	
6	136,200	105,120	
7	158,900	122,640	
8	181,600	140,160	
9	204,300	157,680	
10	227,000	175,200	
11	249,700	192,720	
12	272,400	210,240	
13	295,100	227,760	
14	317,800	245,280	
LBCE Type	Description		
DB	6 x 26 (6 x 19 Class) – Warrington Seale – Extra Improved Plow Steel – Preformed – Right Lay – Regular Lay – I.W.R.C.		
RB*	19 x 19 Rotation Resistant – Extra Extra Improved Plow Steel – Preformed – Right Lay – Regular Lay. Swaged – S.F. = 5:1		
* Use of swivel end with 1 part of line is not recommended.			

WORKING AREAS

Carrier On Outriggers

Carrier On Tires

Note:

- These Lines Determine The Limiting Position Of Any Load For Operation Within Working Areas Indicated.

ALLOWABLE COUNTERWEIGHTS

Counterweight Combinations (1)	Allowable boom lengths	
	Open throats	
	w/o Jib (ft)	With Jib (ft) (4)
0+0 (2)	50–150	PROHIBITED
A+0 (2)	50–190	
AB+0 (2)	50–210	
AB+A (2)	50–220	
ABC+0 (2)	50–240	50–210
ABC+A (2)	50–260	50–230

Notes:

- Counterweight combinations are for a HC–238H II equipped with an open throat boom. Counterweight combinations must be used only as shown on this chart, otherwise crane may overturn or other damage may occur.
- "A" Upper Counterweight – 23,000#
"AB" Upper Counterweight – 42,330#
"ABC" Upper Counterweight – 63,440#
"A" Bumper Counterweight – 13,500#
- Do not swing over the side until outrigger beams are fully extended and outrigger jacks set with upper counterweights, or crane may overturn.
- Maximum jib length is 75 ft.

LIFTOFF CAPABILITIES

Counterweight (upper + bumper)	Maximum Boom Over side (ft)	Maximum Boom Over Rear (ft)	Maximum Boom + Jib	
			Over Side	Over Rear
0+0 (3)	150	N/A	PROHIBITED	
A+0 (3)	190	N/A		
AB+0 (3)	210	N/A		
AB+A (3)	220	N/A		
ABC+0 (3)	240	N/A	210+75	210+75
ABC+A (4)	250	260	220+75	230+75

***Notes:**

- 95% of available crane stability.
- Crane on firm and level surface.
- Maximum allowable boom based on liftoff over side.
- Maximum allowable boom based on liftoff as shown.
- Open throat booms 250ft and 260 ft in length require midpoint suspension pendants.
- Any boom length or boom + jib combination that is rated for liftoff over side may also be erected safely over rear.

LIFTOFF CAPABILITIES ON TIRES OVER THE REAR *

Counterweight (upper + bumper)	Boom (ft)	Boom + Jib (ft)
0+0	100	PROHIBITED
A+0	130	
AB+0	160	
AB+A	190	
ABC+0	190	150+75
ABC+A	210	170+75

***Notes:**

- 95% of available crane stability.
- Crane on firm and level surface.
- Do not attempt to liftoff any boom or boom and jib combination over the side when on tires.

GENERAL WIND RESTRICTIONS GUIDE

WARNING

Failure to follow these wind speed restrictions may result in structural failure of the boom, which would cause property damage and/or bodily injury.

- The effects of the wind force on the hook load are the responsibility of the user and are not taken into account. When hoisting any load in windy conditions, the load wind area and load controllability must be considered for safe crane operation.
- Wind speed is to be determined at the boom top section.

WIND SPEED CHART

Boom and Boom + Jib Lengths up to 250'	
DESCRIPTION	ALLOWABLE WINDSPEEDS IN M.P.H.
1. Normal Lifting Operation. (See Capacity Charts.)	0–20 m.p.h.
2. Reduced Operation. Capacities must be reduced by 20%.	21–30 m.p.h.
3. Reduced Operation. Capacities must be reduced by 40%.	31–40 m.p.h.
4. Reduced Operation. Capacities must be reduced by 70%.	41–45 m.p.h.
4. No Operation. Store Attachment On Ground.	Over 45 m.p.h.
Boom and Boom + Jib Lengths greater than 250'	
1. Normal Lifting Operation. (See Capacity Charts.)	0–20 m.p.h.
2. Reduced Operation. Capacities must be reduced by 35%.	21–30 m.p.h.
3. Reduced Operation. Capacities must be reduced by 60%.	31–40 m.p.h.
4. Reduced Operation. Capacities must be reduced by 80%.	41–45 m.p.h.
4. No Operation. Store Attachment On Ground.	Over 45 m.p.h.

LIVE MAST LIFTING CAPACITIES

Load Radius (ft)	Mast Angle (deg)	On Tires (lbs)	On Outriggers (lbs)
10	71.2	30,000	50,000
11	68.9	30,000	50,000
12	66.5	30,000	50,000
13	64.1	30,000	50,000
14	61.6	30,000	50,000
15	59.1	30,000	50,000
16	56.5	30,000	50,000
17	53.8	30,000	50,000
18	51.0	29,300	50,000
19	48.1	27,200	50,000
20	45.1	25,300	50,000
21	41.9	23,700	50,000
22	38.5	22,200	49,300
23	34.8	20,900	45,400
24	30.7	19,800	42,100
25	26.0	18,700	39,300
26	20.5	17,800	36,700
27	12.7	16,900	34,500

CAUTION

- Refer to operator's manual.
- Live mast backstops must be in position and operative.
- Use rear drum only. Reeve hoist line to drum over mast cross member.
- Reeve hoist rope with three part of 0.875" diameter wire rope.
- Do not swing upper when crane is on tires and upper equipped with "A", "AB", OR "ABC" counterweights.
- Refer to "crane assembly component weights" for weights of components when lifting from live mast.

NOTES:

- Refer to the Operator's Manual.
- The crane shall be leveled on a firm supporting surface.
- Capacities are based on 75% stability.
- See Crane Assembly Component Weights chart for weight of components for crane assembly.
- Rated capacities for 360° rotation.
- Boom extensions may be handled with one hook, "A" and "B" counterweights must be handled with two hooks.
- For crane assembly / disassembly only.

CRANE ASSEMBLY COMPONENT WEIGHTS

Component	Weight
	lb
1. 30' Top Section With 6 Sheave Head Machinery	4,890
2. 25' Top Section with 6 Sheave Head Machinery	4,242
3. 10' Boom Extension With Lifting Sheaves (Non-Luffing Attachment Extension)	2,610
4. 10' Boom Extension With Lifting Sheaves (Luffing Attachment Extension)	3,370
5. 5' Hammerhead With Head Machinery	3,500
6. 10' Tapered Hammerhead Extension	1,500
7. 5' Tip Extension Assembly	640
8. 20' Base Section (w/o 3 rd Drum)	3,195
• 3 rd Drum (w/o Rope)	2,000
• 900' of 0.88" Dia Type RB	990
• 3 rd Drum Deflector Sheave	430
9. Main Boom Extensions (Includes Boom Pins, Deflector Rollers and Pendants)	
• 5 Ft. Open Throat Extension	730
• 10 Ft. Extension	970
• 20 Ft. Extension	1,540
• 30 Ft. Extension	2,120
• 40 Ft. Extension	2,680
• 50 Ft. Extension	3,240
9 Upper Counterweights	
• Counterweight "A"	23,000
• Counterweight "B"	19,330
• Counterweight "C"	21,110
• Counterweight "AB"	42,330
• Counterweight "ABC"	63,440
10. Bumper Counterweight	
• Counterweight "A"	13,500
11. Outrigger Box, Beam and Jack Assemblies	
• Rear Assembly	9,950
• Front Assembly	8,980

WORKING RANGE DIAGRAM

35' HAMMERHEAD BOOM

Notes:

1. Boom geometry shown is for unloaded condition and crane standing level on firm supporting surface. Boom deflection, subsequent radius and boom angle change must be accounted for when applying load to hook.
2. Maximum and minimum boom angles are equal to the values listed in the capacity chart for each boom length.

**WORKING RANGE DIAGRAM
50' TO 260' MAIN BOOM ON OUTRIGGERS**

MAXIMUM BOOM ANGLE
SEE NOTE 2

Notes:

1. Boom geometry shown is for unloaded condition and crane standing level on firm supporting surface. Boom deflection, subsequent radius and boom angle change must be accounted for when applying load to hook.
2. Maximum and minimum boom angles are equal to the values listed in the capacity chart for each boom length.

CAPACITIES FOR LIFTING WITH 10' BOOM EXTENSION

BOOM		360° ROTATION	
Radius (ft.)	Angle (deg)	On tires without counterweight	On outriggers with/without counterweight
10 – 12	78.4 – 73.6	45,000	45,000
13	71.1	39,500	45,000
14	68.6	34,900	45,000
15	66.1	31,200	45,000
16	63.4	28,200	45,000
17	60.7	25,600	45,000
18	57.9	23,300	45,000
19	55.0	21,400	45,000
20	51.9	19,700	45,000
25	33.3	13,600	45,000

1. Refer to Operator's Manual.
2. Use front drum only. Reeve hoist line under live mast cross member.
3. Reeve hoist rope with 2 parts of 7/8" diameter wire rope. See Operator's Manual for correct procedure.
4. Caution: Do not swing upper when crane is on tires and upper equipped with "A", "AB", or "ABC" upper counterweights.
5. Refer to "Crane Assembly Component Weights" for weights of components to be lifted.

CAPACITY DEDUCTIONS FOR LIFTING OFF MAIN BOOM HOOK WITH JIB INSTALLED

When using main boom hook, while jib is attached, reduce boom capacities by the values in the following chart:

Jib Length (ft)	Capacity Deduction (lbs)
30'	2,000
45'	2,400
60'	3,200
75'	4,200

MAXIMUM ALLOWABLE CAPACITIES FOR 5' TIP EXTENSION

LIFTING CAPACITY TO BE THE SMALLEST OF THE FOLLOWING VALUES:

1. 18,000 lb (Maximum).
2. The standard crane lift capacity minus 700 lb for the boom length, tip extension load radius, and counterweight configuration in use on the crane.
3. The wire rope allowable pull from the Wire Rope Capacity Chart.

NOTES:

1. All notes are to be adhered to as listed on the standard lift crane capacity charts.
2. Reduce the main boom lift capacities by 700 lb when the 5' tip extension is installed.
3. The maximum boom length on which the 5' tip extension can be installed is 230'. Consult Operator's Manual.
4. Do not lift or suspend a load from the 5' tip extension and main boom at the same time.

30' Open Throat Boom Peak with 5' Tip Extension

Main Boom Capacities – On Outriggers – 35 Ft Hammerhead Boom						
Load Radius (ft)	Boom Angle (deg)	Counterweight Combinations – Upper + Bumper				
		360 Degree Rotation				
		0+0	A+0	AB+0	AB+A	ABC+0

Jib Capacities

Hydraulic Lattice Boom Truck Crane

HC-238H II 150-ton (136 metric ton) HYLAB Series

Tube Boom + Jib

- 50' – 230' (15.24 – 70.10 m)
Open Throat Boom
- 30' – 75' (9.14 – 22.86 m) Jib
- On Fully Extended Outriggers
- 360° Rotation
- "ABC" + "A" Counterweight
Options

Note: ABC + 0 capacities are published in the Crane Rating Manual only.

CAUTION: This material is supplied for reference use only. Operator must refer to in-cab Crane Rating Manual to determine allowable machine lifting capacities and operating procedures.

TUBULAR JIB NOTES FOR OPEN THROAT BOOM

1. Capacities are for a HC – 238H II Truck Crane with “ABC + 0” (63,440 lb + 0) and “ABC+A” (63,440 lb + 13,500 lb) Counterweight. Verify crane counterweight configuration and consult proper jib capacity chart prior to lifting loads.
2. Capacities are for Truck Crane working areas for 360°, described on the working area chart found in the General Information Section of the Crane Rating Manual and are based on crane standing level on outriggers on firm supporting surface.
3. Capacities are limited to a LBCE 62” x 70” tubular boom with an open throat and a LBCE 24” x 32” cross-section jib with jib mast properly assembled.
4. Two parts of 7/8” Diameter Type “N”, Type “DB”, or Type “RB” wire rope are required for maximum lift.
5. Capacities are for 30’, 45’, 60’, and 75’ jib lengths only.
6. A jib cannot be used on open throat boom lengths longer than 230’.
7. The least stable condition is over the side.
8. All capacities are in pounds and are not more than 85% of the tipping loads. Those capacities in the shaded areas are governed by factors other than those that would cause a tipping condition.
9. A deduction must be made from the jib capacities for the weight of the following: Main boom hook block or hook ball, jib hook block or hook ball, slings, grapple, load weighing devices, etc.

WORKING RANGE DIAGRAM

50' TO 230' OPEN THROAT BOOM WITH 30'–75' JIB

MAXIMUM BOOM ANGLE
ANGLE SEE NOTE 2

Notes:

1. Boom geometry shown is for unloaded condition and crane standing level on firm supporting surface. Boom deflection, subsequent radius, and boom angle change must be accounted for when applying load to hook.
2. Maximum and minimum boom angles are equal to the values listed in the capacity chart for each boom length.

HC-238H II - w/ 62" x 70" Tube Boom, w/ 24" x 32" Tube Jib, w/ ABC + A Cwt

General Use Only. Refer to the Tubular Jib Notes for Open Throat Boom before operating the machine.

General Use Only. Refer to the Tubular Jib Notes for Open Throat Boom before operating the machine.
